Office of Small Business Programs John F. Kennedy Space Center

John F. Kennedy Space Center (KSC) and its prime contractors are committed to increasing competition in contracting, enhancing our socioeconomic programs, and providing private industry the maximum opportunity to do business at KSC. In order to demonstrate this commitment, NASA KSC and its prime contractors joined forces and created a forum, Prime Council Board (Board), to offer “One Face to Industry.”

The Board serves as an invaluable resource to preserve and promote the best interests of small business concerns by creating a channel through which they can more effectively penetrate the Federal marketplace. A primary service offered is face-to-face meetings via KSC Prime Time and Joint Counseling. Both formats bring together small businesses and Board members under one roof. Please call 321-867-7353 for more information.

KSC's Office of Small Business Programs aims to foster small business development to meet the needs of NASA's exploration, scientific discovery and research initiatives, maximizing the ability of small businesses to participate in competitive processes through education and providing avenues to increase small business participation in the competitive process of primes represented in the Prime Council Board.

Vision

The vision of the Office of Small Business Programs at NASA Headquarters is to promote and integrate all small businesses into the competitive base of contractors that pioneer the future of space exploration, scientific discovery, and aeronautics research.

Mission

- To advise the Administrator on all matters related to small business
- To promote the development and management of NASA programs that assist all categories of small business
- To develop small businesses in high tech areas that include technology transfer and commercialization of technology
- To provide small businesses maximum practicable opportunities to participate in NASA prime contracts and subcontracts
